Discount from prices in
this catalogue until
Further Notice.

TO THE PROGRESSIVE CONTRACTOR and BUILDER

In presenting this catalogue, we place before you a large assortment of the best material obtainable to-day, at prices unequaled anywhere.

The contents of this catalogue were compiled with great care, and only goods of merit listed, eliminating all unnecessary or inferior products, so that in going over the following pages your time will not be consumed by any thing but articles which are an absolute necessity in your particular line of business, and when you stop to consider our price, you will agree with us that this book will help you more than any other to solve the problem of conservation, and the conservation of the dollar is in these days of high cost of living the vital issue.

Why not harness every one of your hard earned dollars, and make them yield for you more value in the future than in the past? This can be easily accomplished by adopting our method of purchasing hardware and builders' supplies.

No matter in what town you live, our goods will be shipped immediately upon receipt of your order, by the shortest and quickest freight route.

We eliminate the useless middle-man's profit because we ship direct to you from our large ware-house, and consequently give you the benefit of this elimination in the price of the goods purchased.

If you have never purchased from us, why not do so now? Why not find out for yourself how easy, convenient, profitable and generally satisfactory it is to buy from us, thereby saving money. Our fixed principle is to satisfy the customer at any cost, to state the truth about the goods offered, give the best possible price and refund the money if goods are in any way unsatisfactory, in which case we pay the freight both ways.

We pay the freight on all orders of \$50.00 or more, on anything listed in this catalogue with the exception of the following few articles:

NAILS
SASH WEIGHTS
SASH CHAIN

IRON STANCHIONS
JOIST HANGERS
COPPER STORE FRONT BARS

We urge you to keep this catalogue for reference when compiling your next order, so that we might demonstrate to you the facts mentioned above.

Term; cash with order, one price to all.

Perry Supply Company,
Erie, Pa., U. S. A.

Simple Rules for Ordering by Mail

BE SURE TO READ THIS PAGE

How to Order

Make out your order on our order blank if you have one. If you haven't one, we will mail you some, or you can use a plain piece of paper. Write in your own way what you want, giving the NUMBER also the SIZE and FINISH you desire, when this information is necessary. This is very important. Do not forget to state the size and finish, or it will delay your order until we can write and ask for the information. Do not be afraid you will make a mistake. Hundreds of orders are received by us every day from people who have never ordered by mail before. Write in any language and write in your own way. We have interpreters to translate all languages. Always sign your name and address plainly.

How to Send Money

Enclose in letter check to amount of your order or a Postoffice Money Order, which you can get from your postmaster; an Express Money Order which you can get from your express agent, or a New York Bank Draft, which may be obtained at any bank in your town. If you prefer to send cash, take the money to your Postmaster and tell him to register it. It will reach us safely. Do not send cash without registering.

Our Liberal Terms of Shipment

We sell for cash only. The prices quoted in this Catalogue are list prices from which we allow you a liberal discount. Our prices are alike to everyone, regardless of the amount of merchandise purchased. All get exactly the same low prices.

Write us for discount sheet.

Time Required to Fill Orders

We usually fill our orders within from twenty-four to forty-eight hours of the time they are received. We pride ourselves on giving our customers prompt service. You can very easily figure just how long it is going to take for you to receive your shipment from the time you have mailed your order to us.

About Unnecessary Correspondence

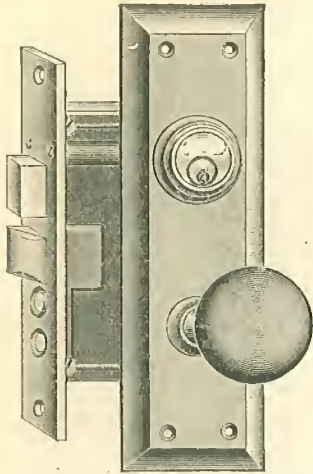

We employ a large corps of experienced clerks for the accommodation of our customers, to answer letters, and we are glad to furnish any information that may be desired, but we daily receive hundreds of letters of inquiry about things that are plainly answered in this catalogue. Before writing please be sure that the information you desire is not in the catalogue and save loss of time and unnecessary expense. Letters concerning shipments can often be avoided. We receive many letters from persons who have ordered goods and have not allowed sufficient time for the order to reach us, the goods to be packed and shipped and reach destination. Never write about an order until ample time has been allowed for the goods to reach you. If for any reason it is necessary for us to delay shipping your order, we will advise you promptly to this effect.

How to Return Goods

We positively will not accept goods returned to us C. O. D. either by mail or express. Before returning goods, we ask that you communicate with us in regard to them, as we are frequently able to adjust matters in a manner to avoid delay occasioned by return of goods. Be sure to mention your invoice number under which goods were shipped to you. When returning a package by mail be sure to write your name, address and invoice number plainly at the upper left-hand corner of the package. Send us by separate mail the particulars and instructions. Do not enclose written matter of any kind in this package as by doing so you are liable to a fine of \$10.00 and double letter rate postage. Do not under any circumstances enclose money with the goods. Never seal packages returned by mail, but tie them securely with twine. Do not fail to register mail packages worth \$2.00 or more. Merchandise is sometimes lost when sent by open mail. We reserve the right to refuse to accept goods which have been kept over ten days or show signs of wear.

OUR GUARANTEE

Every order is accepted by us with the understanding that if goods we send you are not found satisfactory in every respect, you can return them to us at our expense and we will refund your money. You can readily see that we could not afford to make this guarantee unless we were sure of pleasing you.

The Latest Improved Friction Sash Center

THIS is the only friction center you can apply to your sash without cutting. Just mortise out the rebate the length of the center, and slip the center into place. Absolutely weatherproof. Made for transoms or pivoted sash of any weight or thickness. No catches or lifters necessary as these centers hold sash in any position when open and lock securely when closed.

Open and close with pole and hook when sash are high up from floor.

NEW YORK SAFETY-DUMB WAITER

We do not pay the Freight on any thing on this page

Prices Quoted on Larger Dumb Waiters upon Request

NEW YORK SAFETY DUMB-WAITER

THE above illustration is a perspective view of the wheels which go on the top of the well, arranged to have the weight at the back, as shown on the opposite page. The method of attaching the brake grip on the other side of the shelf to which the fixtures are attached is also shown. Place the brake grips in such a position that the hand rope which elevates the car will run through it. To apply the grip, pull the small cord which hangs down the well. To release it, pull down on the rope which will cause the grip to drop off. To have a smooth, easy working dumb-waiter, overcome friction in every place possible.

Fixtures one size only. Suitable for all well holes under 24 inch square, not larger. Can be set up by any mechanic. Packed one set in a case. Diagrams for erecting accompany each set. The wheels should be placed on top of car so that weight of car shall be lifted from the center in all cases. They can be placed diagonally if necessary to accomplish this. Counterweight should weigh about the same as the combined weight of car and the two wheels on top, not less. Always use flat counterweights, which can be run in guides or box as desired. For stringing use, pliable cotton rope. For operating $\frac{1}{2}$ inch; for safety, $\frac{3}{8}$ inch; for brake, $\frac{1}{4}$ inch. Samples of rope sent with each set.

Price of Fixtures only, per set - - \$31.00

**New York Safety Dumb-waiter fixtures,
with No. 1 car, counterweight, guide,
runs, weight runs and all ropes for
first 10 feet of travel - - - \$96.00**

For each additional foot in height - - .75

We do not pay the freight on anything on this page.

Take Notice of How Our Bar Grips the Glass

Thus preventing fronts from being blown out by strong winds.

No. 346 Corner Bar made entirely of seamless copper; no steel or iron to rust and no wood to rot and decay.

Price per foot.....\$1.25

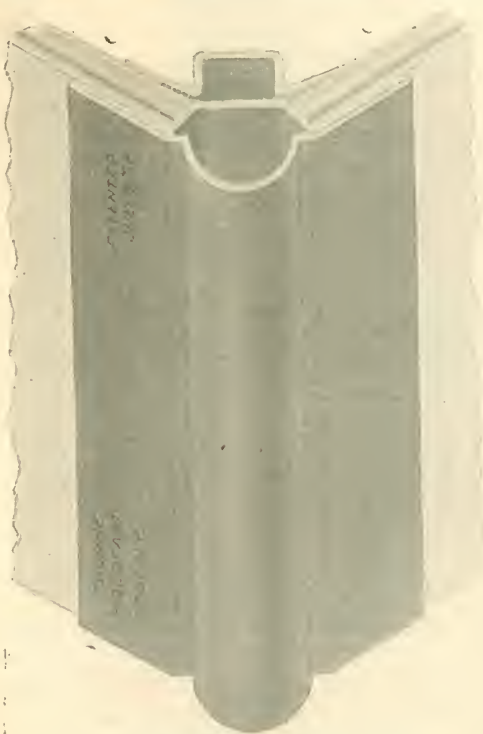

Send us a rough sketch of your proposed front and we will send you a blue print, showing how to properly lay out your work to fit our Bars and quote you on the complete copper, glass, prism and marble necessary to complete it in a proper manner.

Complete catalogue of store fronts mailed upon request.

No. 347 seamless copper dividing bar per foot.....\$1.25

NOTICE: We do not use any steel or iron to reinforce our copper bars. They are made extra heavy and rigid to prevent breakage of glass by winds.

We do not pay the freight on anything on this page. : :
